About Me

I'm a frontend developer with over 5 years of professional experience, specializing in building modern, responsive web applications using **React.js**. I have a deep understanding of **JavaScript (ES6+)**, **HTML5**, and **CSS**, along with hands-on experience using modern frontend tools like **vite** and **npm/yarn**. My expertise includes crafting cross-browser and cross-region compatible interfaces, implementing responsive design principles, and managing complex application states using tools like **Redux** and **React Context**.

Education

Bachelor of Computer Science (2017)
Multimedia University Cyberjaya

Skills

React / React Native

Javascript

Typescript

Redux

Express JS

CSS

Language

- English
- Malay
- Tamil

Experience

○ **CodeBaze**

2022 - Present

React Developer

- Contributed to CodeCrew, a blockchain developer evaluation platform, and developed a customized dashboard solution for international clients while collaborating with a multi-cultural team.
- Built and maintain a private shared UI library to streamline frontend development across teams. (**React Native, React, TypeScript, Redux, and Azure DevOps**)

○ **NightMorning Studios**

2020 - 2022

Full Stack Developer

- Created a custom dashboard for a game to let non-designers update data, and implemented backend functionality using **React, Express.js, FaunaDB, AWS S3, Netlify, and Redux Toolkit**.

○ **Streamline Studios**

2018 - 2020

Junior Game Programmer

- Built the mobile game NightStream (**Unity, C#**) with integrated Facebook Open Graph sharing (**Express.js, Pug.js**), and developed the cross-platform title Bake N Switch (Unreal Engine 4, C++).
- Also contributed to level design on the AAA game OutRiders (**Unreal Engine 4**).

○ **SteelCase Malaysia Sdn Bhd**

2017 - 2017

Junior Application Engineer (Internship)

- Engineered an AR Android app for 3D product visualization (**Unity, Project Tango**) and created an InDesign scripting plugin for automated image placement.
- Additionally, built tools for large-scale data validation (**Excel VBA**), XML-to-database workflows (Java, MySQL), and a web-based chatbot prototype (**JavaScript, HTML/CSS, DialogFlow**).
